PROFILE

Software Engineering graduate with hands-on experience in web and database development using SQL Server.Currently building practical skills through an IT Helpdesk traineeship at Al Ahli Hospital, alongside prior training in Business Continuity Management (ISO 22301) at protiviti. Demonstrated application development skills through independent projects, including a nutrition management mobile app and an AI-assisted transportation platform. Strong communicator and team player, eager to grow within a dynamic development environment.

EXPERIENCE

Business Continuity Management Trainee — protiviti **3-month training**

- Completed a 3-month training program on ISO 22301 (Business Continuity Management System – BCMS)
- Gained hands-on exposure to BCMS implementation standards and business continuity planning practices

IT Helpdesk Trainee — Al Ahli Hospital **Current**

- Currently training in IT Helpdesk support and SQL Server within a hospital IT environment
- Assisting with technical support tickets and gaining practical experience in database management using SQL Server

EDUCATION

Bachelor of Software Engineering 2021 - 2025

Al Zaytoonah University of Jordan

PERSONAL PROJECTS

NutriLife - Graduation Project

A full-stack mobile nutrition management application designed to help users manage personalized diet plans, track health progress, and communicate with professional nutritionists. The app enables meal planning, progress monitoring, user–nutritionist interaction, and secure profile management through an intuitive mobile interface and a robust backend system.

I also worked using Claude AI to develop an **Wasel transportation application in Qatar**
The system allows drivers to register through the app by filling in the required information, and enables new users to sign up easily and create their accounts.
The application supports user authentication and role-based registration for both drivers and riders.

COURSES

Asp.net core Pioneers Academy in Jordan 2024 - 2025

Html,JavaScrip,Css udemy 2024 - 2025
